# IRIS

1932

R. MARSHALL

2253 North La Salle Gardens
DETROIT, MICHIGAN

### Forget the Depression

—plant a garden. Plant an estate or a bed in the backyard—some private area where you can retreat from the onslaughts of outrageous fortune.

Your bonds may have soured. Dividends may have become rare. Maybe your pay has been cut or your job abolished. Most of us feel that we've been betrayed. Our castles in the air have been dissipated by raging deflationary winds. Our paper profits have vanished. What appeared to be safety thirty-six months ago looks like the flimsiest kind of insecurity today. The whole business seems unreal.

But in the garden will be found a cheerful peace. Nature in 1932 is much like Nature was in 1929. She's a generous, tender, soothing, mothering comforter. In the garden the tulips bloom just as surely. The peony is not trying to remain liquid—it declares a generous dividend of beauty. Rose garden coupons are as good today as they were in former years, good for armfuls of bloom. The delphinium still pays interest.

Here is an integrity not found in business. Every garden institution is solvent. And here is work for which wages have not been cut. Whether you go at it on your knees with your hands in the dirt or try the vicarious thing of doing the brain work under a lawn umbrella while some peasant person mangles the stubborn glebe at your direction, the reward is sure.

So plant a garden. Plant a garden and let your brain clear. Let the evening perfume of a rose arbor calm your nerves and bring peace to your soul. If you ever needed the loyalty of growing things, you probably need it now. And if you require iris, here they are: The varieties are listed alphabetically for quick reference.

After each variety is given its official rating made by the American Iris Society, on the scale of 100. First is given the exhibition rating—the score of the variety as a specimen flower. Second is given its garden rating—its value in the land-scape. Many of the newer varieties have not yet been judged.

The list offers no variety with a rating under 80.

Then is given the originator of the variety, the following abbreviations being used: Burch., Burchfield; Cay., Cayeaux; Gey., Geylenkek; Gros., Groschner; G. & K., Goos & Koenemann; Lem., Lemon; Mil., Millet; Mit., Mitchel; Mor., Morrison; Sturt., Sturtevant; Verd., Verdier; Vilm., Vilmorin; Wmson., Williamson.

All plants are shipped as soon after July 1 as possible. An endeavor will be made to conform to particular shipping date where the customer specifies definitely. Cultural directions accompany all shipments. Plants are sent carriage paid.

Acheron, 85-88 (Sturt. 1924) Red purple	0.50
Afterglow, 83-82 (Sturt. 1917) Grayish

Mrs. A. W. Tait, a narrow petalled bloom of
soft porcelain blue
Perry's Blue (Perry 1912) A sky blue Si-
berian. Grassy leaves
Pseudacorus Gigantea, rich yellow, grows to
5 feet in moist location
Snow Queen (Barr 1900) Delicate white
blooms. Easy to naturalize
Versicolor Blue, native American species.
Likes wet ground
Stella Main (Main 1928) A white form of
Iris Versicolor. White falls, yellow
blotched 1.00
POGOCYCLUS IRIS
Interesting hybrids, delicately veined, with
ruffled petals. Colors and form unlike the
bearded iris common to our gardens. Plant in
well drained sunny location. While easy to grow,
not many gardens can boast of these varieties.

#### COLLECTIONS

My customers have found the following collection plan most satisfactory. I like it because I get a lot of fun out of it. If you do not feel competent to make a wise selection from this list, tell me something of your color preferences and send me the money—\$2.00 or \$200.00, any amount you want to spend—and I'll make up a collection that you'll be proud of. The more confidence the customer displays the more likely my generosity is to get the better of me. That's human nature.

#### GIFT BOXES

A garden lover appreciates nothing more than a gift of rare plants. I try to handle such matters with understanding. The rhizomes are boxed niftly as a gift and sent with a letter naming the donor. You may select the varieties or leave the selection to me—just tell me how much you want to invest in happiness for your friend. Shipping dates religiously observed.

#### AMERICAN IRIS SOCIETY

Every iris lover should join. Costs \$3.00 a year. You get a booklet "Irises for the Beginner" and four valuable bulletins each year. Send your application to J. B. Wallace, Jr., Secretary, 129 Church street, New Haven, Conn.

#### MICHIGAN HORTICULTURAL SOCIETY

For Michigan garden enthusiasts. The \$3.00 annual dues include a year's subscription to the National Horticultural Journal. I'll be glad to propose you for membership if you'll send your application to me.
